Biohaven Appoints Technology Investor John Yetimoglu to Board of Directors

August 6, 2026

Infinitum founder and Groq board director brings frontier AI and technology-investing expertise to Biohaven as the company advances AI-enabled approaches to drug development

NEW HAVEN, Conn., Aug. 6, 2026 /PRNewswire/ -- Biohaven Ltd. (NYSE: BHVN), a global biopharmaceutical company, today announced the appointment of John Yetimoglu to its Board of Directors, effective immediately.

Mr. Yetimoglu is the Founder and Chief Investment Officer of Infinitum, an investment firm specializing in semiconductors, videogaming, and next-generation AI application platforms. He currently serves as a director on the board of Groq, a leader in AI inference computing, where he was an early investor and served through the company's landmark $20 billion transaction with NVIDIA in December 2025. Earlier in his career, Mr. Yetimoglu was an analyst at Morgan Stanley covering the technology and biotechnology sectors. He holds a bachelor's degree in economics from Columbia University.

His appointment reflects Biohaven's conviction that the next wave of breakthroughs in medicine will be driven by the convergence of biology, data, and computation. As the company expands its use of artificial intelligence, machine learning, and advanced computational methods across discovery, translational science, and clinical development, Mr. Yetimoglu's perspective on frontier technology and AI infrastructure is expected to strengthen the Board's strategic oversight in these areas.

"John sits at the intersection of technology and life sciences at exactly the moment those worlds are coming together," said Vlad Coric, M.D., Chief Executive Officer and Chairman of Biohaven. "His firsthand experience building and investing in category-defining AI companies gives our Board a rare, forward-looking vantage point as we integrate new computational approaches into how we discover and develop medicines for patients with serious diseases."

"Biohaven has an extraordinary record of translating science into approved therapies, and the opportunity to apply modern AI and technology to drug development is only accelerating," said John Yetimoglu. "I'm honored to join the Board, and to help Vlad and the company harness these tools in service of its mission to bring relief to patients."

About Biohaven
